ICYMI: Donalds Joins The Evening Edit

WASHINGTON – Congressman Byron Donalds (R-FL) joined *The Evening Edit* on Fox Business Network to discuss President Trump's historic \$92 billion A.I. and energy investment into the U.S. economy, the NASDAQ hitting a new record high, and core inflation continuing its downward trend over the past five months.

Watch the full interview [here](#) or below:

"We have to be first in line when it comes to A.I., and energy dominance..."

"Once again, President Trump and his team are doing the absolute right thing for the future of our country. We have to be first in line when it comes to A.I., and energy dominance here in the United States, and this is a major step forward. If you're going to talk about how America is going to continue to lead economically into the future, it is about making sure that we win the race on A.I. with China, and it has many implications - some governmental, some business, but it's gonna mean great economic growth prospects for the future of America. Major step in the right direction by President Trump... I talked with the President and his team a couple of weeks ago. We talked specifically about nuclear power, small-scale nuclear modular reactors. This is the wave of the future."
